〔講義の目的〕 This course has several goals, including improving vocabulary range (mastery of 2,000 high frequency words and academic words), learning basic fluency skills such as how to describe daily objects, talk about daily routines, how to give directions, how to use and count money, and how to talk about future dreams and goals.			
〔講義の概要〕 English conversation is not an interview; simply asking and answering questions will not lead to natural speech. Students will develop their active (i.e., speaking) vocabulary as well as practice using communication strategies. The textbook provides many examples of real-life English in typical daily situations. Students will make a speech, a short 5-minute pair dialogue, and a longer 10-minute dialogue in front of classmates. Weekly vocabulary quizzes will help students recycle what they learned from previous lessons.			
〔履修上の留意点〕 There is a saying, “Use it or lose it,” and this is definitely true for learning a language. Tests can help with new words, but only practice using the language will help students take control of English and make it their own. Shadowing is a strategy that students can use outside the class to practice both speaking and listening skills. Classmates are also a great resource. When students help each other, they can also help themselves. One on one conversations with the teacher are not possible in large classes; students will need to engage in conversation with each other to make progress.			
〔到達目標〕 <ul style="list-style-type: none"> <li>• Be able to make a speech in English</li> <li>• Learn at least 200 new words or expressions by the end of the course.</li> <li>• Gain speaking self-confidence for practical overseas trip situations.</li> </ul>
